PÉNICHETTE 935 – A RELIABLE BOAT, READY TO CRUISE

Available immediately and available to view at the BRAM base (Canal du Midi)

Year of construction: 1999 – Asking price: €28,000

This Pénichette 935 is an easy and enjoyable boat to handle, which has benefited from several maintenance and refurbishment works in recent years, particularly during the winter lay-up of 2025/2026.

Powered by a NANNI 4.380 engine in good working order, with 3,434 operating hours, she offers comfortable and precise handling. She completed 298 hours of navigation during the 2026 season, without requiring any breakdown assistance.

She handles very well and is a pleasure to steer, making her ideal for enjoyable inland waterway cruises. Several items of equipment have recently been renewed, allowing her to be used for cruising straight after purchase.

Equipment and technical specifications :

Engine: NANNI 4.380, in good working order, 3,434 operating hours

Gearbox: ZF12M, replaced in April 2026

Battery charger: QUICK SBC140 NGG, 12 A

Batteries: 2 × 110 Ah AGM batteries (08/2025) and 1 × 75 Ah Optima engine-starting battery

Water heater: QUICK Nautic Boiler B3, 40 litres, heated by the engine or electricity

Heating: TRUMA 4000 gas heater

Oven: ENO

Refrigerator: Isotherm Indel Webasto, 130 litres

Work carried out

The boat has undergone several recent maintenance and refurbishment works to improve her overall condition:

Replacement of the engine damper and stern tube hydrolube bearing during the 2025/2026 winter lay-up

Renewal of the flooring in the side passageway and forward cabin during the 2025/2026 winter lay-up

Renewal of the interior lining in the side passageway and forward cabin during the same period

Renewal of the main rubbing strake in 2024

Cruising performance / Engine speed – indicative speed :

1,000 rpm = 5 km/h

1,500 rpm = 7 km/h

1,800 rpm = 9 km/h

Items to consider :

The engine has a slight vibration due to the age of its engine mounts. In addition, replacement of the TRUMA 4000 heating system should be planned. As this equipment is ageing, repairs are becoming difficult and expensive, and new spare parts are now very difficult to source.

Our opinion :

A reliable, easy-to-handle Pénichette 935 that is particularly enjoyable to steer and has benefited from recent work on several important components. With its engine in good working order and a 2026 season completed without any breakdown assistance, this boat represents an excellent opportunity for anyone wishing to start enjoying inland waterway cruises soon after purchase, while planning to replace the heating system in due course.
