The boat will be available in October 2026 and can be viewed at the Buzet base (Lot-et-Garonne, France).

Recent Nanni N4.50 engine, replaced in 2020 (only 2,100 engine hours).

The Confort 1350 is an ideal inland waterway cruiser for four couples, offering four spacious cabins (with approximately 2 metres of headroom) and four private bathrooms, each equipped with an electric toilet.

Our inland waterway cruisers are meticulously maintained throughout the season. Every winter, they are taken out of the water for a thorough inspection and complete overhaul of the deck and hull, together with the application of antifouling.

Our services

Thanks to our network of bases throughout France, some of our locations can offer you a range of services. Our teams have in-depth knowledge of our boats and genuine technical expertise, enabling them to provide the following services:

- Mooring for your boat
- Winter storage and maintenance repairs
- Installation of additional equipment
- Assistance with obtaining your boating licence

What is the annual maintenance budget?

The design of Nicols inland waterway cruisers, built with polyester hulls, keeps maintenance costs very low. Their simple, practical and functional design, originally developed for the boat rental market, also contributes to their low maintenance costs.

As an owner, you should plan to have your boat taken out of the water every 3 to 4 years. Otherwise, routine maintenance is much like that of a car, including regular oil changes.

We have several other boats available for sale. Please do not hesitate to contact us, and we will help you find the right boat for you.
